

Annual Report to the Community

Programs have changed in ways unforeseen before the pandemic. They are currently offered online rather than in the library building. When the crisis is over we look forward to a return to on site events. However, we anticipate that zooming will continue to be a part of what we do.

The Board of Trustees has engaged BBS, an architectural / engineering firm to plan replacing the 55 year old HVAC / boiler system with a modern energy efficient system. BBS has also been engaged to assist as the Trustees have begun looking into possible renovations of the layout of the library building to better serve the needs of the community.
